Meaning

For a life to have a meaning, one is to search for a meaning. It's our responsibility to try to expand our minds and challenge ourselves in search of enlightenment. I sympathize with patient Kratochvil.

Great DLC but VERY challenging for a new party
Especially the brawl cause you can't use any kind of weapons and I wasn't prepared for that... quot;slime san" is a very fun and very hard action platformer that stands along side "Super Meat Boy", "The End is Nigh" and many more. The game's story is nothing too speical, in the game you play as Slime San (Duh) as you atempt to escape out of a giant snake monster to return to your loving family. The game's story is not why you would play though, the game is fast, fun and really hard that made me shake but I kept playing because the game is fun and challenging. I highly recomend this game to fans of "Super Meat Boy" and the Action Platformer genre.. Best puzzle game ever!!!. ---{Graphics}---

you have to approach it as such.

you will enjoy it to the fullest with a steering wheel and good pedals and lots of track time, dedication and patience.

=> drive OFFLINE first, get to know the tracks, get to know the cars and understand how to setup a car properly.

========

now, i bought it during the dreampack 1+2+3 era and i gotta say, i only needed those because i drove lots of nordschleife day in and day out and also only offline for almost 2,5 years.

just recently started driving online and its definitely another world that pushes me to improve myself even more.

when more and more dlcs were published i bought em while they were on sale and now i definitely suggest buying the ultimate version when its on sale. definitely a must have.

as the ultimate package goes: good track diversity and car diversity

BUT the standard version definitely lacks serious content.

======

maybe best handling, reasonably good force feedback (depends on steering wheel) and decent graphics - also well optimised, no stuttering and issues running full grid races.

insane amount of modding possible - lots of tracks, cars and other ui mods to improve the experience.

unfortunately misses night and weather conditions in racing and a good user interface.
so the two must have mods are: content manager and sol mod (day and night and weather mod).

nonetheless absolutely a YES from me.. Drive through buildings and ♥♥♥♥ up green cars while pew pew pewing enemy gangs.. Decent game with a few flaws. I wish I could remap controller buttons because they are crippling. WASD is not my preferred control scheme for first person puzzle games. The puzzles are challenging but the difficulty curve ramps up a little too quickly. I ended up using guides. It's not a long game but that isn't a bad thing.

Tetris meets Space Invaders. An enjoyable, albeit somewhat choppy SHMUP experience.. great game!
It has some similarities with hacknet (another great game btw), but has less terminal comands, and therefore a bit less hacking. Also in this game you play as the government which is a nice turn around!. Cool game, though there's still some words that are weird to say the least (Rnase?) but all in all it's fun.
Pause function can be abused too easily - it's not needed to be allowed to pause during a round, when a round takes a few minutes only anyway and you have pauses in between rounds. Like this its too easy to go for a very high score.. Totally unoptimized. Load times that would make a C64 look good. Resolution selections are wonky. !080 wouldnt go to 1080 and no 1360x720 setting. Huh? Framerate stutters and I was even stalling opening the inventory screen. Refunded.. Ah yes, a game that would make my drunk self play better when I drink vodka.

10/10 ♥♥♥♥♥.
